

Grand Rapids Area Ice Fishing Report 12-31-2010

By Jason Green

Another year is now coming to a close and as I look back over the past twelve months I can't believe how incredible the year has been.

Over the Christmas break we have been putting the miles on filming for UPNORTH Destinations. I think you are going to like the finished product along with the new "how to" footage.

One thing nice with filming for UPNORTH Destinations, it has allowed us to fish different lakes and see what is working and what isn't.

One presentation that "is" working is Northland Fishing Tackles "NEW" Live-Forage Fish-Fry Minnow Trap. We have been fishing this presentation without any live

bait on deep flats in 28'-30' of water. The vibration on this is pretty incredible and you can actually hear it. As I mentioned there is no live bait needed. The new HD Fish-Photo-Image paired up with the sonic vibration is all you need. I have also been using Northland's "NEW" Bionic Ice in 5lb AquaFlage Blue Camo.

With it being a new season the

market is flooded with new products and I like to try them all but I always like to use my "Go To" baits that I know will put fish on the ice.

We have had great success dead sticking with a Forage Minnow jig

in one hole and rattling a 1/16oz or 1/8thoz Buck-Shot or Macho Minnow in another hole. Lots of times the rattling will bring them in but less aggressive fish will grab the dead stick. It's the perfect Walleye one two combination!

It's early in the Hard Water Season so check back often!

Hope to see you on the ice!!!

See You On The ICE!!! jason@upnorthinc.com www.upnorthinc.com (218) 259-8592
