

Grand Rapids Area Fishing Report 6-21-2010

By Jason Green

The first day of summer is officially here and with it emerges summer fishing patterns.

This past week has been pretty unusual with lots of rain and quite a bit of wind thrown in the mix. In fact there were several days we couldn't even get on the water.

With all the extreme weather taking place the area lakes got pretty turned up and water temperatures dropped back down to the mid sixty's.

With water temperatures dropping back down I have found on several of the area lakes jig and a minnow combination is working

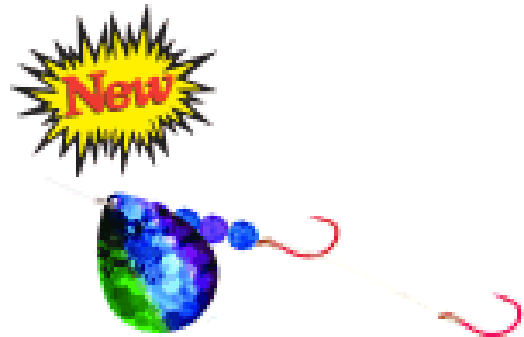

best. Northland's Fireball in Watermellon is always my first choice and tip it with a Spot Tail Shiner. Spot Tails are getting hard to come by right now but most the area bait shops have plenty of Goldies on hand. If you are working with larger minnows I would suggest going with Northland's Gum Ball Jig which has a longer shank.

Reports are coming in that spinners are starting to show positive results being pulled .8 to 1.0mph. If you haven't done so check out the new Baitfish-Image Spinner Harness Colors and Mr. Walleye Crawler Hauler from Northland Fishing Tackle. They both make great search presentations.

Crappie fishing continues to be excellent. We have been finding them near their spawning areas but schooled up out over the first break in deeper water. A crappie minnow on a plain hook or Northland Pan Fish Tubes are producing best

New Baitfish-Image Spinner Harness Colors Are Now Available

Mr. Walleye Crawler Hauler Spinners Have Over Sized Blades For More Vibration To Attract Fish. Great For Trolling And Drifting .Giant Walleye!!!

See You On The Water!!! jason@upnorthinc.com www.upnorthinc.com (218) 259-8592
